

1 October 2026

Situation Bulletin 02

Situation Overview

Continuous rainfall from **24 to 27 September 2026**, associated with a low-pressure system over the Bay of Bengal, triggered widespread floods, landslides, inundation, and related disaster incidents across Gandaki, Lumbini, Bagmati, and Madhesh provinces. Ahead of the event, the Department of Hydrology and Meteorology (DHM) issued forecasts warning of heavy to very heavy rainfall and the potential for flash floods, landslides, waterlogging, and disruptions to essential services.

According to the latest situation update, **30 people lost their lives, 15 were injured, and 3 remain missing** as a result of the rainfall-induced disasters. The impact on communities has been significant, with **1,923 families directly affected, 234 houses completely destroyed, and 150 houses sustaining partial damage.** (Data source: NDRRMA Sitrep)

The heavy rainfall also caused extensive disruptions to transportation and connectivity. Flooding, erosion, and landslides led to partial or complete obstructions along several major highways and strategic road corridors, including Prithvi, BP, Araniko, Pasang Lhamu, Siddhartha, Mid-Hill, and Narayangadh-Mugling ro

ads. Although rainfall has gradually decreased in eastern and central Nepal, the weather system shifted westward, maintaining the risk of flash floods and rising river levels in Lumbini, Karnali, and Sudurpaschim provinces. Search and rescue operations, evacuations, and damage assessments continue, while improving weather conditions are expected to support ongoing response and recovery efforts.

Immediate needs: NFRIs (Tarpaulin, Tent, Blanket, Mattress etc.), Ready to Food items

NRCS Response:

In coordination with government authorities and local disaster management stakeholders, the Nepal Red Cross Society (NRCS) has mobilized volunteers across affected districts to support search and rescue operations, evacuation efforts, and the temporary relocation of families from flood-prone communities to safer locations. To address immediate humanitarian needs, NRCS has initiated the distribution of emergency shelter and relief items. NRCS continues to closely monitor the evolving situation and stands ready to scale up response efforts as additional needs are identified.

- In Myagdi, approximately 106 people from Paudwar, Annapurna-5, have been relocated by helicopter to temporary shelters. NRCS dispatched 40 blankets by helicopter through the District Administration Office.
- In Nawalparasi East, 150 people evacuated to safe place i.e. the school and party palace
- In Rupandehi, Flood early warning committee Palpa sends regular early warning regarding Tinau river to the community in Sainamaina Municipality

NRCS Distribution

Items	Distributed Numbers
Tarpaulin	134
Blanket	242
Utensils Set	33
Mattress	164
Dignity Kit	76
Bucket	10
Kishori Kit	20
